KAY KAY FLUID SEALS LIMITED
OIL SEAL REFERENCE NUMBER / OIL SEAL TYPE

The first two 1 three figures i.e. Abbreviation preceeding the numerical digits denote the type of an Fluid Seal For Example: KX 62428-- First two 1 three letters indicate the rubber material in which the oil seal is made. Of the numerical digits of the first one 1 two 1 three numerals denote the Outer Diameter I Housing Diameter of the Seal to the nearest size in millimetre and the following two 1 three numerals denote the shaft Diameter of Seal to the nearest size in millimetre .Last one 1 two numerals indicate the height of oil seal.

For Example

	KX	62	42	8
	Nitrile rubber oil seal	O.D. in mm	Shaft Dia in mm	height in mm

In respect .lof Kay Kay Fluid Seals Limited oil seals rubber material used in t~e manufacture of oil seal is indicated in1he first two 1 three letters of the reference number as below:

- | | |
|--------------------------|------------------------------|
| (i) KXS - Silicon Rubber | (ii) KXP - Polacrylic rubber |
| (iii) KXF - Viton rubber | (iv) KX - Nitrile rubber |

In certain cases if two seals are of same dimensions and material but different types they bear suffix A/B/S in the reference numbers. For Example: KX-1008013A -- Single lip oil seal - K4B seal type
KX-1008013B -- Dual lip oil seal - K4D seal type

In case of projected lip oil seals height is mentioned as seal height without projected lip 1 total seal height with projected lip in reference number. For Example -- 38287 / 9 7mm is height of oil seal without projected lip
9mm is height of oil seal with projected lip

Certain oil seals are reffered by their old popular part numbers mentioned in bracket Eg KX-635177 (K-305)
